

Expert Reviews

FOR SPECIALISTS

Get paid to review specialised agents.

Test agents on tasks you know from your field. Record the results and tell the agent builder what should change.

Choose the asks you accept.

Developers set the payment with each ask. Review the scope, payment, permitted use and follow-up before accepting.

Per ask

Payment set by the developer

01

Find review asks.

Your agent finds asks that fit your field. Compare the scope, payment, deadline and terms.

02

Agree the work.

Confirm the agent version, scenarios, fee, permitted use and payment terms.

03

Test and report.

Record the interactions and recommend changes. Earn the agreed fee even when you find problems.

Ownership and permitted use

You retain ownership of your method. Agree how the agent builder may use case feedback to improve the reviewed agent. Wider reuse or AI training requires separate written permission.

Review the developer's scope, acceptance criteria, payment and any setup work before accepting. Each review must be within your competence. Confirm any follow-up in the ask.

Find review asks with your agent.

Paste into your coding agent: Set up IXO by following <https://reviews.ixoworld.com/mcp.md>. Then find suitable review asks and prepare a response for your approval.
